

After (proposed)

What moves, and where it goes

Today	After	Still there?
Right panel opens on Sources ; Chat is one of six tabs	Opens on Chat , like Jenni; Sources, Papers, Citations, Check, Comments as labelled icons on the right edge	Yes — all six, one click
Three boxes above the text ("What this chapter is for", the 4-step guide, "Finding papers...")	One slim status line: papers found · ready to cite · chapters planned — Show opens the details	Yes — same content, folded
Two-row toolbar (Chart, Diagram, footnote... on a second row)	One row; Chart, Diagram, footnote, colours, equations under More ▾	Yes — every tool
Header: Assist 1/50 · Draft 0/2 · History · Share · How suggestions work · Feedback · Export · theme	Share and Export; usage, History, How suggestions work, Feedback and theme under ...	Yes — every item

Chat's Library / This thesis / Find papers switch below the box	Chips above the box: Library · Web · This chapter (as Jenni's Web / Library / Current document)	Yes — same scopes
Long explanatory sentences on screen	Short labels; the explanation on hover and in Help	Yes — same words, moved

Also from the Jenni comparison (separate steps, after approval): the setup steps fold into one-line summaries with "Edit", inside the editor; the first suggestion is one sentence rather than a paragraph (needs a prompt test round).
